# Vehicle Data Owner: Value

# Vehicle Data Owner: Privacy Protection

## NHTSA & GDPR Guidelines

- **Transparency:** provide consumers with clear, accessible and meaningful privacy and security notices or agreements
- **Choice:** give vehicle owners choices about the collection, use, sharing, retention and deconstruction of data
- **Respect for Context:** use collected data only for purposes for which the data was collected
- **Minimization, De-identification and Retention**
- **Data Security:** implement measures to protect data from loss or unauthorized disclosure
- **Integrity and Access:** maintain the accuracy of personal data and allow consumers to review and correct such information;
- **Accountability:** Data collecting entities need to comply with applicable privacy and security agreements or notices.
