

**CLEPA IMDS SUPPLIERS' GROUP MEETING**

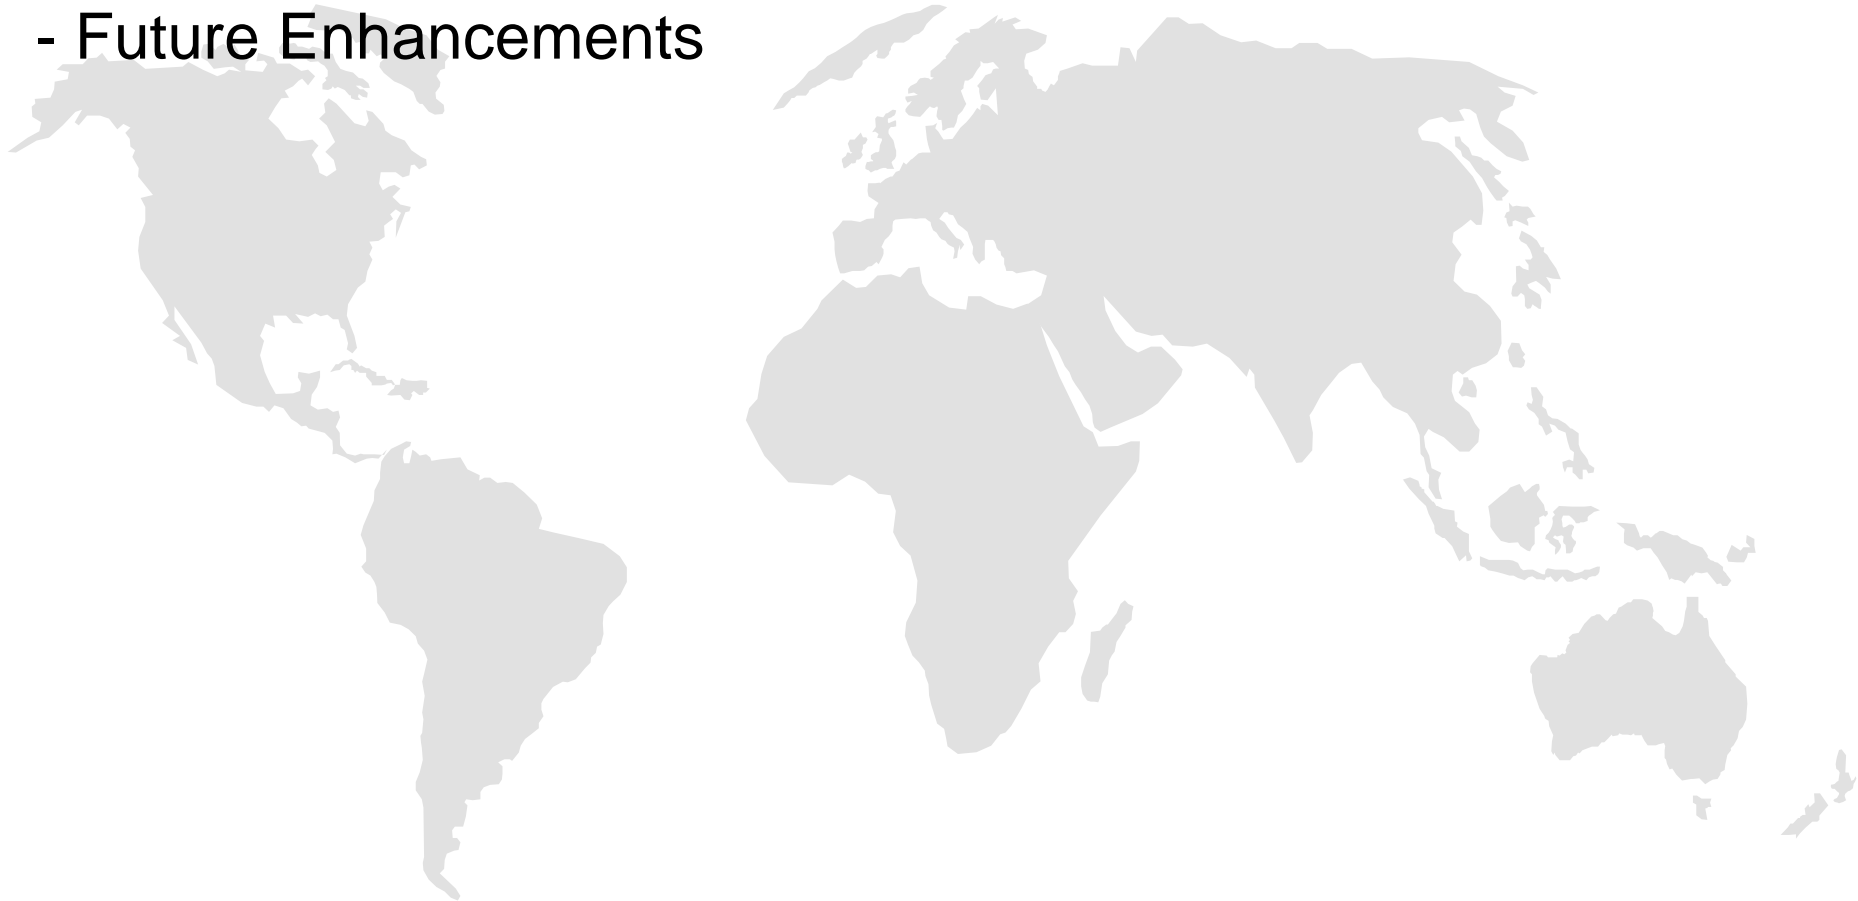

Stuttgart, 23rd April 2009

Dr. Karin Oldenburg-Nazaruk

## Topics

- Future Enhancements

## Enhancements

**‘Thank you’ to the suppliers organisations\* for their input to the enhancements!**

### Procedure:

- Collection of enhancement suggestions from associations and OEMs
- Presentation of the content by the associations
- Vote in the IMDS SC according to „Enhancement voting rules“
- Limiting factors:  
at least 50% of voting members, ranking of result, available budget

\* Suppliers organisations CLEPA, JAPIA, AIAG

## Enhancement, Implementation

Enhancement	„Champion“	Support by (one representative per association)
Use of latest version of IMDS SC Materials	Karin Oldenburg-Nazaruk, BMW	Are you interested?
Warning message for highly confidential substances (Wildcards)	Timo Unger, Hyundai	Are you interested?
Expanded Certificate of Expenditure Filtering Attributes	Maria Axsäter, GME Saab Doris Hill, GM USA	Are you interested?
Material creation wizard	James Lundström - Volvo Hanna Ljungkvist - GME Saab	Are you interested?
No portion type “rest” for wild cards	Benjamin Plaga - VW	Are you interested?
Multi-Searching of substances and detailed information of search result	Heiko Lüssmann-Geiger, Audi Maria Axsäter, GME Saab	Are you interested?
Add the function Export to Search	Malin Svendsen - GME Saab James Lundström - Volvo	Are you interested?
Remove chapter 'Recyclate Information' from MDS navigation menu	Sven Doleski - Daimler	Are you interested?

Please contact L.S. Ayril

## Enhancement, Details

- Use of latest version of IMDS SC Materials (OEM for Suppliers)

→ Description from Enhancement Sheet:

*If IMDS standard materials (e.g. ILI List) are used sometimes a higher version would be available. Referenced older datasheets often contain wrong information which should be updated. IMDS should check datasheets in the release process, give an error message (or at least a warning) if a higher version of an IMDS SC Material is available.*

*The most up to date versions are used in new datasheets.*

## Enhancement, Details

### - Warning message for highly confidential substances (Wildcards) (OEM)

→ Description from Enhancement Sheet:

*The system shall give a warning, if highly confidential substances (Wildcards) are added to a MDS*

*If the creator of a material MDS is selecting a wildcard to be added to his MDS, the system shall automatically create a warning (see below or similar wording):*

*“Be aware of your obligations and consequences by using highly confidential substances (Wildcards)*

- You have to check them continuously*
- You have to update them under certain conditions*
- You have to store information about the substances behind the wildcard for at least 30 years*
- ...?*

*Please note: By using the Confidential Substance-Functionality most of your obligations will be simplified are fulfilled automatically”*

*This warning message shall appear already once the wildcard has been selected and not at the end when the MDS will be send.*

## Enhancement, Details

### - Expanded Certificate of Expenditure Filtering Attributes (3 suggestions from suppliers associations)

#### → Description from Enhancement Sheet:

*In "Certificate of Expenditure" :*

- 1. Additional possibility to limit the search for a business unit (company ID) of the company should be implemented.*
- 2. For search results with more than 500 hits: implementation of a "button" to go to the "next 500" hits*
- 3. In result list for own MDS's should display the MDS recipient*
- 4. Be able to search on Own by:*
  - Org Unit*
  - last edited by user logged in*
  - associated contact person*
  - Type of MDS (e.g. material, component, ...)*
  - customer*
- 5. Be able to search supplier by:*
  - Org Unit sent to*
  - Type of MDS (e.g. material, component...)*
- 6. In the non-standard selection, be able to select from the Sent or Received box using the same filters as on the existing Sent/Received boxes*

## Enhancement, Details

### - Material creation wizard (Suppliers association)

→ Description from Enhancement Sheet:

*Implement a material creation wizard similar to the process chemical question. This material creation wizard would guide users that are creating materials through the process of instilling a standard material number, symbol and norm or standard.*

*Similar to the new process chemical question, when a user creates a material that usually has a standard material number, symbol, or norm and standard and the user does not enter one, query the user mentioning that they usually do and whether this one should have based on material classification. Additionally, if they do enter a material norm, standard, or standard material number, query the user if they should be using an IMDS Committee material. This could include instituting a possible pop-up window for popular norms for materials added when using classifications 1-4.*

*If a material is created with a Std Material Number that already exists as a published material either a pop-up or warning that shows during creation only (not once MDS is internally released)*

## Enhancement, Details

- No portion type “rest” for wild cards (OEM)

→ Description from Enhancement Sheet:

*When creating a material MDS, the portion type “rest” shall not be available for wild cards. Only the portion types “fix value” and “substance range” shall be available.*

## Enhancement, Details

- Multi-Searching of substances and detailed information of search result (OEM)

→ Description from Enhancement Sheet:

*To meet various environmental regulations, weight and percentage of substance would be the key information.  
Fast recognition for the substance.*

## Enhancement, Details

- Add the function Export to Search (OEM)

→ Description from Enhancement Sheet:

*Add Export function to Search. (As already existing in Received)  
(Useful when downloading the internal/in-house parts)*

*Additional information to be included*

- Submitted date
- Created by
- MDS/Module

*Possibility to Search for in-house MDSes same way as you search for received MDS.*

## Enhancement, Details

- Remove chapter 'Recyclate Information' from MDS navigation menu (EDS)

→ Description from Enhancement Sheet:

*Remove the chapter 'Recyclate Information' from the MDS navigation menu because neither anything be entered there nor will information from old MDSs be displayed.*

*Inactive since release 3.0.*

*Removal would improve usage of IMDS and avoid helpdesk calls*

*Will be removed:*

*Will be kept:*

A screenshot of the MDS 'Recyclate' form. The 'Recyclate' tab is circled in red. The form content includes: Material: ProtMat 5.1.b unfilled Thermoplastics, Does the material contain recyclate? (Yes selected), Content of post industrial recyclate: (e.g. from injection molding, rejected parts etc.) From 10 to 15 [%], and Content of post consumer recyclate: (e.g. from scrapped and damaged vehicles, packaging wastes, scrapped household appliances etc.) From [ ] to [ ] [%].

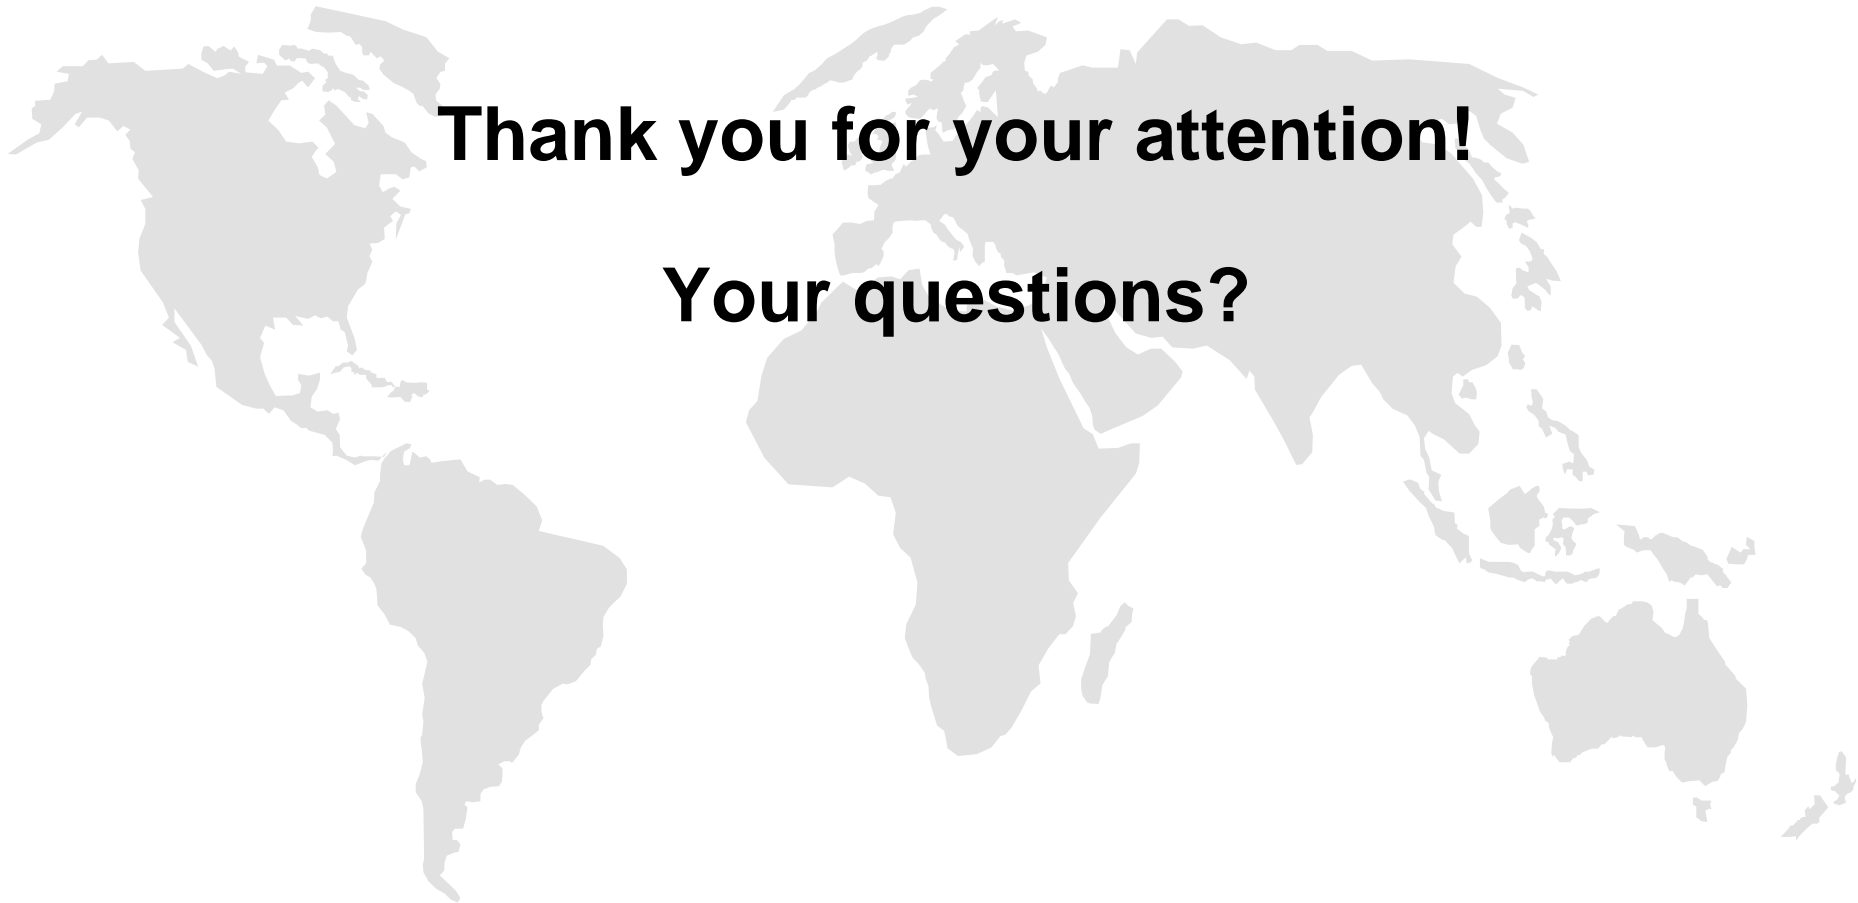

## Enhancement, Implementation

## Enhancement, Timing

What?	When?	Who?
Definition of responsible persons for each enhancement	May 2009	OEMs + Suppliers
Signing of confidentiality agreement	May 2009	Suppliers
Creation of detailed Business Designs (BD)	May – August 2009	OEMs + Suppliers (EDS)
Release of BDs	August 2009	Steering Committee
Development/ Testing/ Release 8.0	to be planned	EDS, (OEMs, Suppliers)

**Thank you for your attention!**

**Your questions?**
