A. Schiffleitner, iPoint  
P. Grossinho, Tenneco

*Conclusions and next conference:* M. Hauke, CLEPA

sponsored by:

organised by:

European Association of Automotive Suppliers

## The Sponsor:

**iPoint**

Point empowers companies to collect, analyze and report all necessary data to assess the environmental, social, and economic impacts of their products and related processes. By digitalizing the lifecycles of products and supply chain relationships our software solutions support enterprises to manage compliance, risk, and sustainability.

This drives the transparency companies need for good decision-making to govern and evolve their business. In a world of limited resources but unlimited ideas for new products this has become a precondition to successfully market products worldwide – now and in the future.

CLEPA brings together well over 100 of the world's most prominent suppliers for car parts, systems and modules and more than 20 national trade associations and European sector associations.

We represent more than 3,000 companies and cover all products and services within the automotive supply chain. Founded in 1959 and based in Brussels, CLEPA is recognised as the natural discussion partner by international organisations and fellow associations.

CLEPA's Materials & Substances Working Group focuses on the importance that several materials have for the automotive supply industry. Join our association now and be part of the discussion!
