

# AUTOMOTIVE SKILLS ALLIANCE

The European automotive industry is undergoing an unprecedented **green & digital transformation**. The mobility ecosystem is facing additional pressures caused by continued supply chain disruptions post COVID-19, and increases in the price of raw materials, energy and semiconductors.

The transition impacts on the **15 million people** employed in the automotive value-chain, putting jobs at risk combined with **challenges** in acquiring new skilled talent for emerging jobs.

It is in this context that the Automotive Skills Alliance was created in November 2020 under the **Pact for Skills**, the first flagship action of the **European Skills Agenda**, firmly anchored in the principles of the European Pillar of Social Rights. The pact aims to mobilise and incentivise private and public stakeholders to invest and take concrete action for the upskilling and reskilling of people of working age.

The Automotive Skills Alliance brings together different stakeholders involved in the automotive ecosystem and to **ensure continuous, pragmatic and sustainable cooperation** on the skills agenda in the ecosystem, collaborating at **European**, as well as on **national** and **regional** level.

# Join the Alliance!

The Automotive Skills Alliance gathers more than **90 partners** including both large automotive-related companies and SMEs, national and local authorities, social partners, sectoral organisations, education bodies and training providers.

## After a year, the Alliance already has:

- Established several Working Groups in key topics
- Launched regional up-/ re-skilling pilot projects
- Get recognised as the the pioneering partnership within the European Pact for Skills initiative
- Established member services
- Set up EU-wide tools including best practices, training courses and the learning platform

## Benefits

Joining the ASA opens countless opportunities and benefits, accessing to a unique platform that provides up-to-the-minute information on funding opportunities for industry and regions, skills intelligence and information about trainings and educational opportunities, among many others.

Through a European-wide cooperation, the Alliance guarantees access to the tools already developed by the previous Blueprints projects and allows partners to give visibility to their results and make their voices heard.

ASA is the one-stop service for funding opportunities to support up-/re-skilling activities, promoting partnership activities to access EU and government grants.
